

Welcome to the Project Solution Suite

Goal's Project Solution Suite has been developed to assist organisations to effectively govern and manage their projects, so that they can be completed as efficiently as possible, and the return on investment in them maximised and achieved as early as possible. The Project Solution Suite is based on the internationally recognised PRINCE2 project management method, providing comfort to organisations that their projects will be managed to industry best practice, but without unnecessary overheads.

The Project Solution Suite consists of the following elements:

Policy	An outline statement of organisational policy regarding the management of projects
Reference Card	A memory jogger for those using the Suite in their daily jobs
Project Management Method	A detailed description of the process underlying the Project Solution Suite
Work Sizing Template	A guide to right-sizing the project management approach to the needs of the project
Document Templates Index	An index to a subdirectory of document templates that capture the critical information required for scoping, planning and tracking each project
Standard Project Templates	Activity schedules for simple, standard and complex projects aligned with the core process underlying the Project Solution Suite
Project Management Handbook	A guide for those responsible for managing project activities
Project Management Checklist	A checklist of the activities to be carried out by the Project Manager during the different Phases and Stages of the Project Lifecycle
Project Governance Handbook	A guide for those responsible for governing projects
Project Governance Checklist	A checklist of the activities to be carried out by Steering Committee members during the Project Lifecycle
Customisation Guide	A checklist of aspects of the Project Solution Suite that could be customised

Even greater value can be obtained by customising the Project Solution Suite to your organisation's specific situation and needs, by developing standard workplans for your most frequent project types, and by briefing and training your managers and staff on how to work with the Project Solution Suite to maximise its value in your organisation.
