

ZEN ANTI-TANK GUIDED MISSILE SIMULATOR (ZEN ATGM Sim™)

Zen ATGM™ Simulator is an indoor Anti-Tank Guided Missile Simulator developed to meet the challenging requirements of missile pilots.

Do not let shortage of missiles be the reason for the missile pilots not getting adequate training.

It allows you to overcome the problems of huge cost, logistics and availability of firing ranges.

The Simulator trains the pilot in detecting, prioritizing, acquiring, tracking and engaging the targets. The simulator has the actual controls of the missile launcher to enhance the training value.

It trains recruits and hones the skills of trained pilots in handling and firing missiles.

H CO.,LTD.

You can track the performance of trainees in real time. Configure training scenarios in accordance with the skill levels of trainees.

The simulator can be configured with any missile launcher and is provided with sights. The scenarios are computer generated and simulate battlefield conditions complete with target area, targets, speed and direction of moving targets and related scenarios of a battlefield.

It provides realistic sound simulation, artificial illumination for night training and complex situations for near-real experience.

Tactical training progresses with increasing degree of difficulty.
