GOAL
GROUP

Recording/playback of faults committed by the trainee.

The trainer can inject on-line faults and obstacles to assess the reactions.

Basic system has one Instructor Station and one Driver Station. Up to 10 driver stations can be controlled by one instructor station.

Environmental conditions like rain, fog, snowfall, intensity of light can simultaneously be created.

In use by Government Transport Institutes, Security Forces, Transport Training Organisations and Road Safety related Organisations.

Training on driving simulator reduces pollution.

The trainer can inject on-line faults and obstacles to assess the reactions.

'Opt for ZEN DRIVING SIMULATOR (ZEN DS) – the difference is REAL'
