

the **ULTIMATE** asset disposal TASKFORCE

Demonstrating the power of teaming, a Newcastle company has gathered key industry players together to cater for the many large-scale disposal activities that arise when significant fleet of assets have reached the end of their economic life.

Originally targeted for the recently formed Defence Disposals Team, the **Goal Group Disposals Team** is led by Goal Professional Services, based in Belmont in the City of Lake Macquarie. The Goal Group provides Small and Medium Enterprises (SMEs) the opportunity to overcome resource limitations and access markets that would normally only be open to much larger organisations.

The strength of the Goal Group is the range of capability with this concept operating successfully for over ten years across Australia.

Goal Professional Services (www.goalps.com.au) operates as the lead company for the Group and manages each project, therefore the client experience is that of dealing with a single entity.

The core Goal Group team comprises:

Goal Professional Services – specialist project management services;

Forgacs Marine & Defence Pty Ltd (a member of the CIVMEC group) – significant facilities in Newcastle, NSW, Darwin, NT, and Henderson, WA, with sea, air, road and rail access, plus blue collar workforce, maritime berthing and hard stand facilities for all kinds of large or numerous fleet assets;

Advitech Pty Ltd – A Newcastle STEM company providing specialist engineers;

Toxfree Pty Ltd – one of Australia's leading environmental, waste management and industrial service providers;

KBR Pty Ltd – specialist project management and engineering skills;

PGM Enviro – specialist maritime disposals capability;

ATSA Pty Ltd (a member of the Bluezone Group) –specialist Defence Engineering capability;

NT Recycling Services Pty Ltd – specialist environmental, waste management and industrial service providers; and

Linfox Logistics Pty Ltd - transport and freight management.

The consolidated team offers strong disposal capabilities for large and small asset fleets and offers:

- Over 45 waste disposal facilities throughout Australia;
- Transport and distribution capability for Asset disposal;
- Large scale facilities in Newcastle, Darwin and Henderson WA for continuous production line disposal of significant asset numbers and/or large assets in a security controlled industrial facility;
- Berthing facilities for maritime assets;
- Landing capability for air assets;
- Rail and high, wide load road transport corridor access;
- On site and portable workforce and equipment for dismantling, cutting, and crushing with low energy machines.

The group holds all required environmental permits and has specialist staff with appropriate qualifications, experience and clearances. We can provide all required disposal certificates.

For large and small asset fleet disposal
