

In the Defence Industry?

Don't be caught by the change in legislation.

Get ready NOW!

The Defence Trade Controls Act 2012 (DTC Act) came into force on 2 April 2016 and has changed the way business is done in the defence sector.

If you are not compliant with the Act or existing controls, you will not be able to transact in the defence sector.

You still have time to act.

Take steps to ensure you are compliant with the new DTC legislation. We can help with training, compliance assessments and audits.

What we Offer

Training

Goal provides training for anyone new to Export Control or who wish to update their understanding of the rules and regulations.

Our Introduction Course covers the basics of Export Control and is suitable for all levels from shop floor to executives.

Compliance Assessments & Audits

Understanding the regulations is one thing, however this doesn't necessarily guarantee compliance. Goal can do an audit on your current processes and procedures, identify the gaps in compliance and recommend a course of action.

If you have an Export Control Audit scheduled, Goal can assist by doing our own Audit and compliance assessment, allowing you time to follow through on any corrective actions prior to your official Audit.

Goal also specialise in SME's engaging with Defence and the prime contractors, flowing down the requirement for "ITAR Certification" to suppliers as a way of ensuring compliance within their own supply chain.

If you transact in the Defence industry, with information, hardware, technical data and/or services related to an item that has been manufactured or modified for a military application, you need to be confident that all staff and contractors are compliant with the regulations.

OUR GOAL IS YOUR SUCCESS

Goal is one of the leading providers of ITAR and DTC Act compliance services. We support companies that are new to ITAR and the DTC laws and regulations as well as major defence contractors that require a high level of expertise and experience.

Contact us to find out why we are regarded so highly and to see what we can do for your company!
